DEFENSIVE DRIVING

DON'T LOST YOUR POTENTIAL REVENUE !

Safe driving is a matter of occupational safety. However, an estimated nine out of 10 time-loss injuries happen off the job, not counting employees who take time off to care for an injured family member.

When a company driver is involved in a crash, a lot of **indirect costs (whether the worker was driving on or off the job) like recovery time, repairing, hiring other vehicle, re-staffing, retraining and lost productivity.** Fewer collisions to company vehicles will help control insurance costs – and safe drivers lose less time from work because they avoid collisions. That is why a defensive driving training can benefit all employees. Defensive Driving Training is designed to teach your employees how to drive safely. The aim of the program is to reduce the risk of driving by anticipating dangerous situations, despite adverse conditions or the mistakes of others. This can be achieved through adherence to a variety of general rules, as well as the practice of specific driving techniques.
